# Landscaper Seeder

## FEATURES

- Front rollers crush lumps, press down small stones, and form a firm seedbed
- Blade agitator metering system
- 3 point hitch for tractors
- Notched rollers place most of the seed at a depth of 1/2"
- Large 3 compartment seed box

*The seed box utilizes a newly designed blade type agitator.*

*Polyethylene blade type agitator is impervious to moisture and is built to provide many acres of reliable seed metering.*

## Turf'n it Out...

Save up to 50% on grass seed! The Landscape Seeder, a bi-directional seeder, is built to handle all turf and landscape seeds. Grass seed is a very expensive commodity. Notched rollers properly place the grass seed in the top 1/2" of a properly prepared seedbed, resulting in maximum seed germination. Seedbed is left smooth and firm with small stones pressed down. Because of this precision placement seeding rates can be cut up to half of the rates previously used.

The Landscape Seeder comes standard with a three-point hitch that can be attached to the front or rear of the seeder frame for tractor mount applications.

*Front rollers crush lumps, press down small stones, and form a firm seedbed while rear rollers split the shallow ridges formed by the front rollers and gently firm the soil around the seeds.*
