

# Rotary Brush Mower

## FEATURES

- Our universal Quick Attach Plates fit most skid steers
- Unique automatic Float-n-Tilt™ System
- Equipped with Safety Shut-Off System™
- Cuts moving forward or reverse
- Hydraulic motor with pressure relief, extremely quiet
- No shear pins or drive clutches
- Dual-edge cutting blades that can be operated in reverse for longer life
- Cut, clear and mulch unwanted brush, thickets, grass and saplings up to 3" in diameter
- Break new trails, clear ditches, construction, property sites, and other overgrown areas
- Best value: powerful, versatile, great price

## Cut Trees, Brush, and Grass...

The Rotary Brush Mower has been engineered for rugged durability, safety, and ease of operation. The 60" and 72" models are built from 1/4" steel making them some of the strongest brush mowers made. This is the most versatile mower on the market today. It not only cuts trees, brush, and unwanted weeds and grass, but can also be used as a finishing mower for lawns. Its unique automatic Float-n-Tilt™ system allows you to cut evenly on level surfaces, as well as the most rugged terrain.

*Pressure Relief System for quick shut-downs safety. Heavy-Duty gear box is standard equipment.*

*Our unique stabilizer bar allows the Rotary Brush Mower to cut heavier material without causing flex to the deck. Something you won't find with the competition.*

*Operates both forwards and backwards.*

*Replacement blade package with blades, bolts, nuts, and washers. Blades are two-sided, double life.*

## Rotary Brush Mower

Brush mower is structurally reinforced adding strength for durability. Our unique **Stump Jumper** and **Swing Away Blade** features, prevent unnecessary damage to the unit. The blade design provides lifting and mulching action.

Unique automatic **Float-n-Tilt™** feature allows for an even cut, following the contour of the land rather than the skid steer. This allows cutting on sidehills and uneven terrain.

This unit is equipped with a **Safety Shut-Off System™** as standard equipment.

Greaseable roller bushing provides for longer life.

Large 6" diameter roller allows brush mower to have a contact point with the ground so you will not experience violent jerking, unlike other brush mowers on the market.
